Pearson Edexcel IAL In Statistics 1 Paper WST03/01

### **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at <u>www.edexcel.com</u> or <u>www.btec.co.uk</u>. Alternatively, you can get in touch with us using the details on our contact us page at <u>www.edexcel.com/contactus</u>.

#### Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: <a href="https://www.pearson.com/uk">www.pearson.com/uk</a>

### **General Marking Guidance**

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

## **EDEXCEL IAL MATHEMATICS**

## **General Instructions for Marking**

- 1. The total number of marks for the paper is 75.
- 2. The Edexcel Mathematics mark schemes use the following types of marks:
- **M** marks: method marks are awarded for `knowing a method and attempting to apply it', unless otherwise indicated.
- A marks: Accuracy marks can only be awarded if the relevant method (M) marks have been earned.
- **B** marks are unconditional accuracy marks (independent of M marks)
- Marks should not be subdivided.
- 3. Abbreviations

These are some of the traditional marking abbreviations that will appear in the mark schemes.

- bod benefit of doubt
- ft follow through
- the symbol  $\sqrt{}$  will be used for correct ft
- cao correct answer only
- cso correct solution only. There must be no errors in this part of the question to obtain this mark
- isw ignore subsequent working
- awrt answers which round to
- SC: special case
- oe or equivalent (and appropriate)
- dep dependent
- indep independent
- dp decimal places
- sf significant figures
- \* The answer is printed on the paper
- The second mark is dependent on gaining the first mark
- 4. All A marks are 'correct answer only' (cao.), unless shown, for example, as A1 ft to indicate that previous wrong working is to be followed through. After a misread however, the subsequent A marks affected are treated as A ft, but manifestly absurd answers should never be awarded A marks.
- 5. For misreading which does not alter the character of a question or materially simplify it, deduct two from any A or B marks gained, in that part of the question affected.
- 6. If a candidate makes more than one attempt at any question:
  - If all but one attempt is crossed out, mark the attempt which is NOT crossed out.
  - If either all attempts are crossed out or none are crossed out, mark all the attempts and score the highest single attempt.
- 7. Ignore wrong working or incorrect statements following a correct answer.

Question Number	Scheme	Marks
1.		
(a)	$E(2\overline{X}) = 2E(\overline{X}) = \frac{2(1+\alpha)}{2}$	M1
	$= 1 + \alpha \neq \alpha$ (therefore $2\overline{X}$ is a biased estimator of $\alpha$ )	A1
		(2)
(b)	$\overline{x} = 6$ $2\overline{x} - 1 =$	M1
	<u>11</u>	A1
		(2)
		Total 4
	Notes	
(a)	M1 for use of $2 \times \frac{1+\alpha}{2}$	
	Alcso correct comparison with $\alpha$ and no incorrect working seen.	
	$\frac{1+\alpha}{2} \neq \alpha$ is M0A0	
(b)	M1 for attempt at $\overline{x}$ and use of $2\overline{x} - 1$ or ft use of their $E(\overline{X})$ from part (a) to	
	find an estimate for $\alpha$	
	A1 11 cao	

Question Number			Scheme			N	larks
2.							
(a)	Expected values: 13.75, 19.25, 17					B1	
		$(18 - 13.75)^2$	$(15-19.25)^2$	$(17-17)^2$		M1	
		13.75	19.25	17		1011	
	Pass	1.31	0.94	0	2.25		
					9.43	A2	I
							(4)
	H ·Dagraa/aat	agany is indepen	lant of department	(no association)			(4)
(b)	II Degree/cat	egory is independ	tent of <u>department</u>			B1	
	$H_1$ : Degree/cate	egory is not indep	pendent of departm	nent (association)			
	v = (3-1)(3-1)	) = 4				B1	
	$\chi_4^2(5\%) = 9.488$				B1ft		
	'9.43' < 9.488, so do not reject $H_0$ / not significant				M1		
	Not enough evidence to show that the <b>Degree/category</b> is not independent of				A 1.G		
	department (no	association) (at	the 5% level of sig	gnificance)		AII	
						-	(5)
			Notos			Tota	19
(a)	B1 All correct e	xpected values (1	notes	A2)			
(")	(a) BT An context expected values (may be implied by A2) $(O - E)^2$						
	M1 Attempting $\frac{(O-E)}{E}$ for their E (may be implied by one correct value)						
	E						
	(A1 any 2 value	s correct)					
(b)	B1 Both hypotheses required must mention degree/category and department at least once. Use of				e. Use of		
	"relationship" or "correlation" or "connection" or "link" award B0.						
	B14 can be implied by 9.466 seen B1ft 9.488 or better Follow through their 1/so may see $x^2 = -7.815$ $x^2 = -5.001$						
	Bitt 9.468 or better. Follow through their <i>v</i> so may see $\chi_{3,0.05} = 7.815$ $\chi_{2,0.05} = 5.991$				1		
	INIT Correct non-contextual conclusion for their (a) and c.v. Can be implied by correct conclusion in context ff their (a) and c.v.						
	A1ft A correct comment in context.						
	Condone "relationship" or "connection" here but not "correlation".						
	Follow through	from their test sta	atistic and cv, but	hypotheses must l	be correct.		

Question Number	Scheme	Marks	
3.			
(a)	$ \begin{array}{c ccccccccccccccccccccccccccccccccccc$	M1 A1	
	$\sum d^2 = 18$	Al	
	$r_s = 1 - \frac{6 \times 18}{7 \times 48} = \frac{19}{28} = $ awrt <b><u>0.679</u></b>	dM1 A1	
		(5)	
(b)	$H_0: \rho = 0$ $H_1: \rho > 0$	B1	
	Critical value 0.7143	B1	
	(0.679 < 0.7143) so insufficient evidence to reject H <sub>0</sub>	M1	
	There is insufficient evidence to suggest a <b>positive</b> correlation between the finishing order in the 200 metre race and the finishing order in the 400 metre race.	A1ft	
(a)	There are tied lengths so use average ranks	(4) P1	
	Then use $r_s = \frac{S_{xy}}{\sqrt{S_{xx}S_{yy}}}$	dB1	
		(2)	
	Notes	Total 11	
(a)	M1 for an attempt to rank athletes lists (at least 3 correct for each)		
	A1 for correct rankings for both (may be reversed). Can be implied by correct $\sum d^2$ A1 $\sum d^2 = 18$ dM1 (dep upon previous M1) for use of the correct formula, follow through their $\sum d^2$ A1 awrt 0.679		
(b)	B1 both hypotheses correct $\rho$ or $\rho$		
	B1 for correct c.v. (sign should match $H_1$ or $r_c$ )		
	M1 ft their $r_s$ and their c.v.		
	A1 ft a correct contextualised comment including positive correlation and races/fin (oe) with all previous marks in (b) scored	nishing orders	
(c)	B1 for use of average ranks or use of 1.5 or 6.5(for C and D)/4.5 or 3.5 (for B and dB1 (dep on $1^{st}$ B1) for use of pmcc (with the average ranks)	G)	

Question Number	Scheme	Marks		
4. (a)	Randomly select a student from 1 to 7 oe	B1		
	Take every 7 <sup>th</sup> student	B1		
		(2)		
(b)	$v = 10 - 1 = 9$ $\chi_9^2(10\%) = 14.684$	B1 B1ft		
	No evidence (at 10% level of significance) that the <b>digits</b> generated do not			
	follow a uniform distribution.			
		(3)		
	$H_0$ : Uniform distribution is a good fit (for the two-digit numbers generated)			
(c)	H : Uniform distribution is not a good fit (for the two-digit numbers generated)	B1		
	$P$ $F$ $(P - T)^2$ $P^2$			
	$U$ $E$ $(U-E)^2$ $O^2$			
	31 40 2.025 24.025	B1		
	49 40 2.025 60.025	M1 A1		
	30  40  2.5  22.5			
	42 40 0.1 44.1			
	$ \begin{array}{c ccccccccccccccccccccccccccccccccccc$			
	$\begin{array}{ c c c c c c c c c c c c c c c c c c c$			
	$\sum \frac{(O-E)^2}{E} = 8.25$ or $\sum \frac{O^2}{E} - 200 = 8.25$	A1		
	$-\underline{E}$			
	$\chi_4^{-}(10\%) = 7.779$	BI		
	$[8.25 > 7.779]$ Reject $H_0$ / Significant	M1		
	There is evidence to suggest the two-digit <b>numbers</b> generated may not follow a	Δ1		
	uniform distribution.	(0)		
	To concrete a simple random complete Lylice would need to concrete two digit	(8)		
(d)	numbers (from 00 to 69)	B1		
	But Luka's table would not be suitable for generating <b>random</b> two-digit			
	numbers	B1ft		
		(2)		
		Total 15		
	Notes			
(a)	B1 for the idea of generating a random number to determine first student selected			
	B1 for every /th student (not just select 40 students)			
(0)	B) for context acgrees of needonn (may be implied by 2 B) D16 for context without $14.024$ whether $6.4.1 \pm 1.0$	15 007		
	Bin for correct critical value 14.684 or better in their d.i. so may see $\chi_{10}^{-}(10\%)$	=13.98/		
	B1 (dependent upon $2^{n\alpha}$ B1) for correct conclusion in context with digits (oe) and	uniform distr.		
(C)	B1 Both hypotheses correct $P_1$ All expected values = 40			
	B1 All expected values – 40 M1 Attempting $(Q = F)^2$ or $Q^2$ with at logst 2 compact (1 dr truncated or rounded)	onft their E		
	In TAttempting $\frac{(O-E)}{E}$ or $\frac{O}{E}$ with at least 5 correct (1 dp truncated or rounded)	or I.t. their <i>E</i>		
	A1 all $\frac{(O-E)^2}{E}$ or $\frac{O^2}{E}$ correct (1 dp truncated or rounded). May be implied by 8.25 or 208.25			
	A1 8.25 oe			
	B1 correct critical value 7.779 or better			
	M1 for a correct non-contextual conclusion (ignore any contradictory contextual of	comments for		
	this mark) based on their cv and their test statistic			
	A1 correct conclusion in context with all previous marks scored			
(d)	B1 for the idea of generating <b>two-digit</b> numbers (for a simple random sample)			
	Bitt Luka's table not suitable for generating two-digit random numbers for a simple random			
SC:	If B0B0 scored, 'table only suitable for generating one-digit <b>random</b> numbers' sc	ores B0B1		

Question Number	Scheme	Marks
5.		
(a)	$s_A^2 = \frac{1}{39} \left( 790258 - 140.4^2 \times 40 \right) \qquad s_B^2 = \frac{1}{31} \left( 581430 - 134.7^2 \times 32 \right)$	M1
	= 45.4256 <u>awrt 45.4</u> $= 26.4232$ <u>awrt 26.4</u>	A1 A1
		(3)
(b)	$\mathrm{H}_{0}:\mu_{A}-\mu_{B}=5$	B1
	$\mathrm{H}_{1}:\boldsymbol{\mu}_{A}-\boldsymbol{\mu}_{B}>5$	B1
	s.e. = $\sqrt{\frac{45.4256}{40} + \frac{26.4232}{32}}$ (= awrt 1.4)	M1
	$z = \frac{\pm (140.4 - 134.7 - 5)}{s.e.} = \text{awrt } 0.50$	dM1 A1
	c.v. = 1.6449	B1
	(Do not reject $H_0$ ) Insufficient evidence to support the greengrocer's belief.	
	(Insufficient evidence that the <b>difference</b> in <b>weight</b> between type A oranges and type B oranges is over 5 grams).	A1ft
		(7)
(c)	Large sample sizes so	
	Sample means are normally distributed (CLT)	B1
	$s_A^2 = \sigma_A^2$ and $s_B^2 = \sigma_B^2$	B1
		(2)
		Total 12
(a)	Notes	
(a)	A1 either awrt 45 4 or awrt 26 4	
	A1 both awrt 45.4 and awrt 26.4	
(h)	D1 Allow aquivalent norman comonta Mustures ()	
(U)	BI Allow equivalent rearrangements. Must use $\mu$	
	BI Allow equivalent realizing ements. Must use $\mu$ .	· 1
	For both hypotheses do not allow e.g. $\mu_1$ and $\mu_2$ unless each has been clearly def	ined
	M1 attempt at standard error (allow one slip) ft their (a) dM1 standardising with $(140.4 - 134.7 - 5)$ and their s.e. (dep on previous M1) A1 for 0.5 or awrt 0.50	
	B1 correct c.v. 1.6449 or better. Allow –1.6449 or better with use of $\mu_B - \mu_A$	
	Allow $p = \text{awrt } 0.309$	
	weights (oe) dependent on all B and M marks scored.	
(c)	B1 must comment on both sample means, $\overline{A}$ and $\overline{B}$ B1 must comment on both variances/standard deviations	

Question Number	Scheme	Marks	5	
6.				
(a)	$\overline{T} \sim N(4, \frac{4}{35})$	M1 A1		
			(2)	
(b)	$\overline{K} \sim \mathrm{N}(\lambda, rac{\lambda}{40})$	M1		
	$2 \times 2.5758 \times \sqrt{\frac{\lambda}{40}} = 2.6$	B1 M1		
	$\lambda = $ awrt <b><u>10.2</u></b>	A1		
			(4)	
(c)	$2 \times 0.99 \times 0.01$	M1		
	= <u>0.0198</u>	A1		
		T ( 10	(2)	
	Notos	l otal 8		
(a)	M1 for Normal distribution			
(")	A1 for correct mean and variance (allow N(4, awrt 0.114))			
(b)	M1 for use of $\frac{\lambda}{40}$ if $\lambda = \sigma$ is used, then M0			
	B1 for $\pm 2.5758$ (may be implied by sight of 10.188)			
	M1 for use of $2 \times z \times \frac{\sigma'}{10} = 2.6$ with $ z  > 2$			
	A1 awrt 10.2 (an answer of 10.15or awrt 10.2 on its own scores M1B0M1A1)			
	SC: Use of $\sqrt{\lambda}$ instead of $\lambda$ leading to an answer of awrt 3.19 scores M0B1M1A0			
(c)	M1 for 2 $p(1-p)$ for any $p = 0A1 0.0198$			

Question Number	Scheme	Marks	
7.			
(a)	$C_1 + C_2 + C_3 \sim N(480, 3 \times 1.25^2)$	M1 A1	
	$P(C_1 + C_2 + C_3 > 475.8) = P\left(Z > \frac{475.8 - 480}{\sqrt{3 \times 1.25^2}} (= -1.94)\right)$	M1	
	= awrt <b><u>0.974</u></b>	A1	
		(4)	
(b)	$W = T_1 + T_2 + T_3 + T_4 + T_5 + C_1 + C_2 \sim N(5 \times 60 + 2 \times 160, 5 \times 2^2 + 2 \times 1.25^2)$	M1 A1	
	$P(W > 625) = P\left(Z > \frac{625 - 620}{\sqrt{23.125}} (=1.03975)\right)$	M1	
	= awrt <u>0.149</u>	A1
